Introduction and Background

This report was prepared by DATA YOU CAN USE, INC, with the support of the Nonprofit Center of Milwaukee.

The framework is based on input and advice from community organizers working in the neighborhoods supported by Milwaukee's Community Development Block Grant (CDBG) program. In partnership with the Nonprofit Center, nine Neighborhood Strategic Planning (NSP) areas participated in the design and development of this template. Partners met to describe the data they wanted – data that would be useful to them in their planning, organizing, and fund development work. They also helped guide the format.

This *is* “data you can use” they concluded. It can be used with their staff, their partners, their funders, their elected officials and the residents of their neighborhoods. It can be used to supplement and support the stories and anecdotes of residents, to build a case for needed resources, and to identify more questions.

The process was replicated by three neighborhoods participating in the Building Neighborhood Capacity Program (BNCP) and subsequently by the neighborhood organizations participating in the Zilber Neighborhood Initiative. In both cases, the neighborhood organizations confirmed the geography, agreed to the core set of indicators and requested additional specialized data. All the completed reports are available on the Data You Can Use [website](#).

This report is among the Neighborhood Profiles completed in 2017 for six additional CDBG Neighborhood Strategic Planning areas.

Plans are underway to expand this effort to additional neighborhoods and to explore how the data can be made interactive. There is also an identified “wish list” for additional data that would help organizers and residents plan their strategies and tell their story. The content and format are better because of the input of the neighborhood organizers and residents who contributed. We welcome your feedback.

Thank you.
